 Closed Sat. & Sun.

TRAILWISE

There is an increasing demand for high-quality, outdoor equipment that is light-weight, tough, and functional. The Ski Hut, as manufacturers of Trailwise equipment, is proud of its position as a leader in supplying this demand. Considerable thought, experience and care go into all Trailwise items. New designs are field-tested by our own staff and by friends who have the knowledge and experience to thoroughly evaluate any given piece of equipment. **MATERIALS USED IN THE MANUFACTURE OF TRAILWISE EQUIPMENT ARE SELECTED FOR MAXIMUM QUALITY AND PERFORMANCE RATHER THAN COST. WE TAKE PRIDE IN THE WORKMANSHIP THAT GOES INTO ALL ITEMS BEARING THE TRAILWISE LABEL AND WORK TOWARD CONSTANT IMPROVEMENT.** To this end, we are again expanding our manufacturing facilities and installing new machinery of the latest design, providing increased efficiency and resulting in a superior product at the best possible price for the customer.

GUARANTEE

We wish to assure you of complete safety and satisfaction in ordering from The Ski Hut. Should any item purchased from us prove defective in workmanship or materials, it will either be replaced or a refund issued if you so desire.

*conservative average temperatures at which discomfort would awake a person. calculated for standard fill; for models with heavier fill lower minimum temperature by 10°

A warm, lightweight sleeping bag is essential to the backpacker's comfort and is probably his most important single purchase. Choose your bag for the coldest use expected and select the highest quality that you can afford.

Sleeping bag temperature ratings are relative and should be used only as an index of comparison between bags. The low temperature range of a bag depends on many factors: adequate ground insulation, humidity, wind speed, and most important, the metabolic rate and physical condition of the sleeper. There is considerable individual variation both in the ability of the body to produce heat and to tolerate cold. Thermal underwear, sleeping bag covers, tents, significantly increase the effective temperature ratings.

MATERIALS

Materials used in the construction of Trailwise bags are of the highest quality available.

TENAYA NYLON was developed by Trailwise for use in constructing down-filled sleeping bags. Beginning with a 50 denier high-tenacity thread, Tenaya is tightly woven with 168 x 100 threads per inch. This resulting high density, combined with a special finishing process, produces a down-proof, water-resistant fabric with low permeability. Tenaya has a smooth even texture and its weight to strength ratio is outstanding.

1.9 RIPSTOP, another excellent and popular nylon fabric, is used in the Ultralight. It is woven from 70 denier thread to the ratio of 112 x 100 threads per inch.

DOWN. A sleeping bag does not produce warmth; it acts as an insulator to conserve body heat. Ounce for ounce, down provides more insulative dead air space than any other material. Down varies greatly in quality. The best down is obtained from mature geese. Even the best down comes in two quality grades: "bag-grade" down (used by most manufacturers) contains from 12% to 20% feathers; "garment-grade" down (used by Trailwise) which contains only 8% to 12% feathers. The best grade of duck down is second only to top quality goose down and is often used in less expensive bags.

DESIGN AND CONSTRUCTION

SHAPE. Except for the Combi, all Trailwise bags are of a mummy design. While a mummy is more confining than the rectangular bag, it significantly increases the insulating efficiency while keeping weight to a minimum.

DIFFERENTIAL. All sleeping bags consist of an inner and an outer shell holding insulating material between them. To achieve maximum lofting and to prevent cold spots, Trailwise sleeping bags are differentially designed, i.e. the inner shell is smaller in dimension than the outer shell.

BAFFLES. Hot-cut from strong nylon netting and sewn between the two shells to contain the down and to prevent its shifting and bunching. Trailwise uses a slant baffle which is offset a full half-tube width for maximum loft. In the Chevron, Slimline and Norrland models, these baffles are sewn into a Chevron pattern which further reduces down-shift and places cross-tension on the shell material, rather than on the stitching, for a much stronger bag. Each baffle is separately sewn off to make each down tube a closed unit, completely eliminating down-shift between tubes.

ZIPPERS. All Trailwise bags come with a No. 5 YKK nylon double slider zipper which may be opened independently from head or foot for optimum temperature control and ventilation. With the exception of the Combi (which will only zip with another Combi) all Trailwise bags may be zipped together, even though length and style may vary.

DRAFT FLAP. Trailwise uses a down-filled draft flap to seal off bag zippers and eliminate this potentially cold area. These oversize flaps are offset, overlapping, and attached with two widely spaced seams to assure a positive draft seal.

HOOD. The hood and shoulder areas of Trailwise sleeping bags are shaped and contoured so that they readily form a smooth effective hood when pulled shut.

FINISH. All exposed raw edges in Trailwise sleeping bags are covered with nylon bias tape. Each bag is constructed by a single seamstress who is personally responsible for that bag, assuring quality control impossible with assembly line construction.

TRAILWISE SLIMLINE BAG. The Slimline, our most popular bag, is designed for the mountaineer or backpacker who must keep weight and bulk to a minimum without sacrificing warmth. The snug, form-fitting Slimline shell minimizes heat loss, resulting in a more efficient, warmer bag. A 7½" differential cut allows maximum lofting of the white goose down, while slanting Chevron baffles sewn at 5" intervals stabilize the down. Each tube is individually sewn off to positively eliminate down shift between tubes. The standard Slimline is a versatile bag for use under general conditions. The overfill Slimline is intended for higher altitudes and winter temperatures. The shell is made of the finest water-repellent Tenaya nylon. A #5 YKK 72" double slider nylon zipper is available on either right or left side so that the Slimline may be ordered in matching pairs that zip together. The double slider arrangement also allows the bag to be opened from head and foot for maximum ventilation and temperature control. Self-forming draw cord hood. Colors are blue or orange. Supplied with a 7" x 18" waterproof stuffsack.

4 SLEEPING BAGS

TRAILWISE CHEVRON BAG. Our finest bag. Designed for expeditionary use under severe winter and high altitude conditions. Nothing has been spared in design, construction or material to make the Chevron the top of the Trailwise line. The light, downproof, water-repellent and extremely durable Tenaya nylon shell has a luxurious feel and will give years of service. A 17½" differential cut allows maximum lofting of premium garment-grade white goose down for optimum warmth/weight ration. Seven-inch Chevron baffles are spaced at 5" intervals and slanted a full half-tube width for greater thermal efficiency. Each tube is individually sewn off to positively eliminate down shift between tubes. 72" #5 YKK double slider nylon zipper on right or left side allows bags to be zipped together. Complete ventilation and temperature control is provided by the double slider zipper which may be opened from head and foot. Self-forming drawcord hood. Colors are blue or orange. Supplied with a 9" x 21" waterproof stuffsack.

CHEVRON 3 will fit persons up to 6'2".

SC/3	44 oz. fill	total wt. 68 oz.	\$145.00

SC/5	52 oz. fill	total wt. 78 oz.	\$160.00
SC/5X	58 oz. fill	total wt. 84 oz.	\$170.00

TRAILWISE NORRLAND BAG. Cut fuller at the shoulder and elbow sections than the Slimline bag. Recommended for those who feel confined by the slimmer mummy style and who are less concerned with the total weight. Shell is light, downproof Tenaya nylon. A 10" differential cut allows full lofting of the white goose down. Down shift between tubes is eliminated by closing each tube individually. Slanting Chevron baffles sewn at 5" intervals stabilize the down. Norrland bags may be ordered in matching pairs that zip together. 72" double slider nylon #5 YKK zippers on right or left side. Bag may be opened from head and foot for maximum ventilation in warmer weather. Norrland 2 is supplied with a 9" x 18" waterproof stuffsack. Self-forming draw cord hood. Colors are blue or orange.

NORRLAND 2 will fit persons up to 5'10".

6 SLEEPING BAGS

TRAILWISE DOUBLE MUMMY BAG. A roomy bag for two people. Shell is blue Tenaya nylon. Slanted Chevron baffles are sewn at 7" intervals. 7" differential. Sewn off tubes. Fill is grey goose down. Individual thermal control is provided by two 70" #5 YKK nylon delrin side zippers which zip from top and bottom with draft flaps and independent draw-cord closures. Velcro fastening of center section between hoods permits opening of entire top of bag. Will fit persons up to 6'4". Color is blue. Supplied with a waterproof stuffsack.

total wt. 111-1/3 oz.	\$190.00
SD/X	72 oz. fill
total wt. 119-1/3 oz.	\$200.00

ULTRALIGHT. A quality bag made in Taiwan. Form-fitting mummy shell is differentially cut and carefully constructed of 1.9 Ripstop nylon for wind and water repellency. Horizontal baffles of stretch nylon mesh are spaced at 5" intervals and slanted 2 1/2" for excellent down control. Differential baffle depth gives greater thickness and insulation above body and tubes are completely sewn off to prevent down shift between tubes. 70" #5 YKK chain double slider nylon zipper may be opened from head and foot for ventilation when needed. Two Ultralights can be joined and the Ultralight will pair with Trailwise bags. Fill is a blend of goose and duck down. Waterproof 9" x 18" stuffsack included. Color: midnight blue or burgundy.

ULTRALIGHT REGULAR will fit persons up to 5'10".

SU/1	32 oz. fill
total wt. 50 oz.	\$70.00

ULTRALIGHT LONG will fit persons up to 6'3"

SU/2	35 oz. fill
total wt. 55 oz.	\$75.00

TRAILWISE COMBI BAG. A "semi-rectangular" bag having a 5" taper from head to foot. An excellent bag for general summer use out-of-doors, or in cabins and campers. Full-length 99" #5 chain YKK Delrin nylon zipper extends across foot section so that bag may be opened flat for use as a comforter. Tenaya nylon throughout. Slanting baffles set at 6" intervals. Tubes individually closed. The Combi will only zip together with another Combi. Filled with grey goose down. Will fit persons up to 6'4". Bag is not hooded, but does have a drawcord closure. Waterproof stuffsack included. Color: blue.

SC017 32 oz. fill
total wt. 61 oz. \$110.00

TRAILWISE SLEEPING BAG COVER. A departure from the traditional design, our cover is designed for a multitude of uses. Rectangular in shape, it measures 44" x 98". No zipper. Large enough to accommodate any Trailwise bag (except double mummy) with room left over for clothing and other gear. Will also double as tarp or groundsheet. Top is blue Tenaya nylon, bottom is beige waterproof 1.9 Ripstop nylon.

TRAILWISE PACKFRAMES AND BAGS

Trailwise packframes are designed and constructed with comfort, durability and lightness as the foremost considerations.

A packframe that is comfortable to wear is the result of (1) a well-contoured and shaped frame and packbag that place the load as close to the body as is practical, (2) a padded suspension system that allows the majority of the load weight to be placed directly on the hips, and (3) a full mesh back panel, originated by Trailwise, which distributes weight and allows maximum air circulation between pack and wearer.

The Trailwise contour frame shapes the load around the back and extends the effective carrying area of the back, both in width and in height.

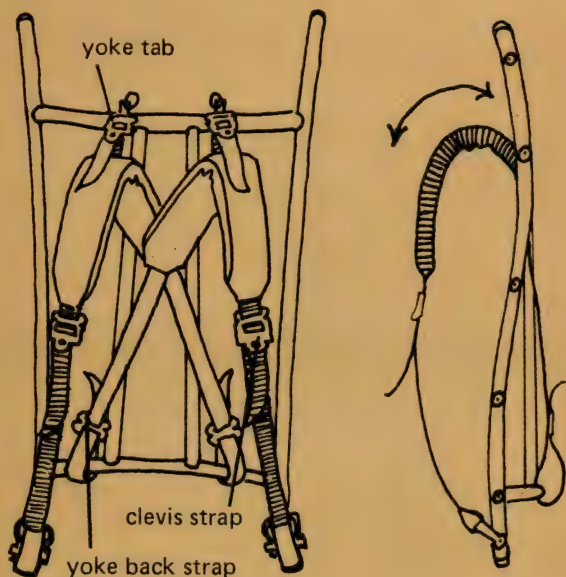

The Trailwise frame is constructed of a non-corrosive, aluminum alloy thick-wall tubing. All parts of the frame contribute to its structural strength because there are no loose or unwelded parts. Every joint is heli-arc welded. The Trailwise packbag is attached to the frame with steel eyebolts and aluminum Rivnuts. This combination of eyebolt and Rivnut attachment has a strength advantage over the usual clevis pin and wire attachment in that the frame need only be drilled from one side, plus the Rivnut helps to reinforce this hole. The eyebolts can be used as lashing points.

TRAILWISE CONTOUR FRAME. Rugged (6061-T6) aluminum alloy; contour plus taper. Features adjustable Ensolite-padded cross straps which give excellent weight distribution, reducing the localized pressure on shoulders inherent in all ordinary shoulder strap suspensions. Full nylon mesh back further distributes weight and allows maximum air circulation between pack and wearer. Full circle padded hip belt comfortably transfers most of weight to hips when desired. Nylon lashing strap securely fastened to frame. Riv-nuts for mounting Trailwise pack bags included.

TRAILWISE PACK FRAME

PACKFRAME ADJUSTING INSTRUCTIONS

The following steps should be taken when adjusting the suspension system of the Trailwise packframe.

- Step 1: The padded hip belt should encircle the hips below the waist and on the flare of the hips and buttocks. Belt placement can be assisted by leaning forward slightly and hunching up the packframe with the back and shoulders until the belt is in the proper position. Cinch up the belt.
- Step 2: Release the slide fasteners on the yoke back straps. Move the yoke assembly forward or backward to that point where the tabs connected to the yoke are slightly forward of the center of the shoulders. Reset the slide fasteners. This adjustment need only be made on the initial fitting of the packframe.
- Step 3: Pull down on the clevis straps until pressure from the yoke is felt on the top of the shoulders.
- Step 4: Pull forward on the yoke tabs to bring the mesh back panel up snug against the back.
- Step 5: Release the clevis straps slightly. This should allow the packframe to settle down on the hips.

The three-quarter length packbags can be mounted in either a high or a low position on the frame depending on where the center of gravity of the load is desired. The high position is used for maximum loads on a relatively smooth trail, and the low position is used for climbing or for rough terrain where balance becomes an important consideration. Both the full length packbag and the three-quarter length packbags extend the full width of the frame.

TRAILWISE PACK BAG MODEL 72. Single spacious sack, roomy enough to hold all your gear for an extended outing. Side mounted. Made of waterproof heavy-duty urethane-coated nylon duck. Five outer pockets with covered nylon zippers. Aluminum hold open bar holds top of bag open for easy access. Large size measures 17" x 29" x 11". Medium and small sizes approximately 1" smaller. CARE AND WAXING OF CROSS COUNTRY SKIS

PREPARATION

The factory finish on new cross country and touring skis is not suitable as a base for waxing. The skis should be scraped and sanded lightly to remove the finish and then Grundvalla or pine tar should be applied. To apply the Grundvalla base, lay the skis on an elevated bench, bottoms up, in a position that will prevent sliding as the skis are being rubbed. Spread the Grundvalla thinly over the entire base, then pass a lighted torch over the base to burn the Grundvalla into the wood. (Be very conservative with the heat.) Heat until the Grundvalla boils, then wipe away the excess with a cloth. Be careful to avoid charring the skis while heating. A good base job should be smooth and just slightly tacky. If the Grundvalla is applied in a thick coat and not wiped, it will work its way up through the wax when it is applied.

WAXING

Always begin waxing with clean, dry skis. If you wax inside, be sure to allow skis to cool outside before use.

Begin waxing with the coldest wax you think will work. This will prevent the necessity of scraping off a warmer (soft) wax in order to apply a colder (hard) wax. It is a good idea to layer the wax moving from hard to soft. A waxing iron can be useful in warming the surface and smoothing the wax.

The idea behind waxing is to give you both kick and glide. It is easy to wax and obtain either kick or glide, but to obtain a balance it is necessary to choose a wax or combination of waxes which will allow the skis to run freely. This is a matter of experience, and all manufacturers make recommendations as to the conditions under which their waxes should be used.

To remove wax merely scrape it off with a scraper and a little heat from a torch. Some manufacturers sell a preparation to remove wax.

FITZROY TENT. A self-supporting tent, the Fitzroy design is setting new standards in mountain tents. The self-supporting feature, in addition to ease of erection, means fewer pegs to add weight, sites no longer have to be large enough to accommodate guylines, and perhaps most important, no more tripping over those guylines. To set up the Fitzroy, simply peg down the four corners to anchor the tent and the pole placement balances stress so that the tent is stable under most conditions. (The Fitzroy is provided with a pullout on each side plus end guys for those rare situations involving extreme conditions when maximum stability is needed.) Floor dimensions 60" x 102". Ridge is 66" long. Height is 51" at peak ends, dipping to 48¾" at center. Sectional poles extend to 61½". Urethane coated waterproof floor of 2-ply nylon extends 16" up sides. Canopy is Tenaya Nylon. Zippered triangular opening on front panel is 32" wide at base, 41½" high and is backed with a zippered nylon mosquito screen. Tunnel entrance and vent on rear panel are also provided with mosquito screens. Net pockets at each end keep small items organized and within reach. Colors green or orange.

Fitzroy Tent complete with fly, poles, pegs.

TRAILWISE GOTHIC TENT. Similar to Fitzroy tent but smaller and lighter and without tunnel entrance on rear panel. Self-supporting. Does not require guy lines under ordinary conditions. Floor measures 57" x 102". Height 44" at peaks, 42" at mid-point. Four sectional poles extend to 56" each. Canopy is Tenaya nylon. Urethane-coated waterproof floor of 2-ply nylon extends 11" up sides. Zippered triangular opening on front panel is 33" wide at base, 42" high and backed with zippered mosquito netting. Vent on rear panel also has mosquito screen. Net pocket for organizing small items. Color: green or orange.

The Monthly Catalog of Experiences

One month you'll find Lito Tejada Flores writing about a difficult ascent of the Devil's Thumb—but you'll find *that* unlike any mountain climbing chronicle you've read before. Most of Lito's story deals with a girl named Kathleen, her daughter Ajilla, and a brief but intense encounter with love on the ferry to Alaska.

Another month Dick Dorworth is writing about his pursuit of the world speed record on skis. But this isn't another *macho*-hero tale—the kind you would associate with a pulp adventure magazine. Dorworth delves deeply into his own feelings about chasing the record, getting it, losing it and watching a friend lose his life on the same fast track.

Yet another month you might read Ned Gillette's account of the first winter crossing on skis of Alaska's Brooks Range; or Bob Chamberlain's subtle description of his Mellow Yellow Submarine Technique in his classic, "The Cruising Man's Guide to Deep Powder"; or Robert Reid's hilarious satire on modern rock climbing, "The Jam Jam Man"; or British mountaineer, Chris Bonington, writing on Himalayan expedition climbing today.

There's much more to Mountain Gazette: reviews, travel, news, soul-searching, information, entertainment and many interesting side trips into the most remote corners of the mountains. (For instance, we gave one issue to an in-depth look at Bluegrass music.) But we like to think that what we do best—what sets Mountain Gazette apart from other magazines in the field—is to bring alive the mountain experience; be it climbing, trekking, skiing, touring or fighting the good fight to save what's life of the world's mountain wilderness.

A subscription to Mountain Gazette is \$6 for one year (12 issues), \$9 for two years (24 issues) or \$12 for three years (36 issues).

Pivetta

In 1951 George Rudolf, founder of The Ski Hut, was in Europe to locate a manufacturer of superior mountaineering boots. His search led him to Montebelluna, Italy, the center of quality boot making in Italy. In Montebelluna he was so impressed with the Pivetta Firm and their 150-year-old tradition of hand workmanship, incomparable comfort, durability and functional design that he immediately began to work with Pivetta in developing a line of mountaineering boots suited to the American market.

First of all an appropriate last had to be developed—proportioned for American feet and with sufficient swing to it to enable the foot to assume its natural shape. For hiking, the last should permit considerable freedom in the toe section, allowing the large toe to function as a thrusting element. The famous Munson last developed for the U.S. Army seemed to lend itself to this application. However, even this last needed to be modified to create boots suitable for American mountaineering and trail use. After two years of experimentation, the last now in use for our Pivetta boots was created. We believe this last to be excellent for the American foot and to provide the best fit of any boot in today's market.

We invite you to compare these features with other manufacturer's products which often seek to copy Pivetta quality.

- Finest quality leathers used throughout with genuine leather insoles and linings.
- Amply padded for comfort and minimal breaking-in.
- Padded tongue pre-formed to shape of foot.
- Snug heel fit supports ankle, prevents lifting.
- Roomy at toe and ball to eliminate chafing and toe jamming on descents.
- Extra strong heel counters and toe caps are hand formed to each boot to assure perfect sizing and snug fit. They retain their shape and will not crack, split or become soft.
- Soles are double stitched inside boot for strength and durability; no exposed sole stitching to wear through or leak; resoling is easier too.
- Italian-made yellow label Vibram soles with highest carbon content assure sure grip and long wear.
- Tempered spring steel shank provides long lasting arch support; will not break or lose shape.
- Hand fitting to the last allows individual finishing and control impossible with machine methods.

HOW TO ORDER BOOTS

Please follow these directions carefully. The information requested below is essential for the fitting of your boots.

1. Put on the socks you intend to wear. Stand up on a piece of paper, having the weight of your body equally distributed on both feet. Holding a pencil vertically, clearly define the outline of each foot.
2. State your usual dress shoe size. Give both length and width; for example 9-C.
3. Enclose the foot outline and your dress shoe size with your order.

NOTE: We guarantee a proper fit. Instructions for trial use of your boots will be sent with them. Please observe these instructions carefully as boots which have been worn out-of-doors will not be accepted for exchange or refund. If the fit is incorrect, send the boots back to us with the coupon provided on the instruction sheet. A new pair of boots will be sent back to you postpaid.

54 BOOTS

JIRISHANCA. By Brixia. Hand formed of famous Swiss "Galusser" leather. This superior leather takes nine months in tanning. (Two separate tannings and hand waxing). Thick rubber mid-sole, three separate leather mid-soles and extra strong steel shank provide rigidity for cramponing. Vibram soles are closely trimmed for edging. Fully lined in soft calf. Padded. Water tight bellows tongue. Sizes 6 to 13; widths: medium and wide.

B601 ave. wt. 6 lbs. \$68.00

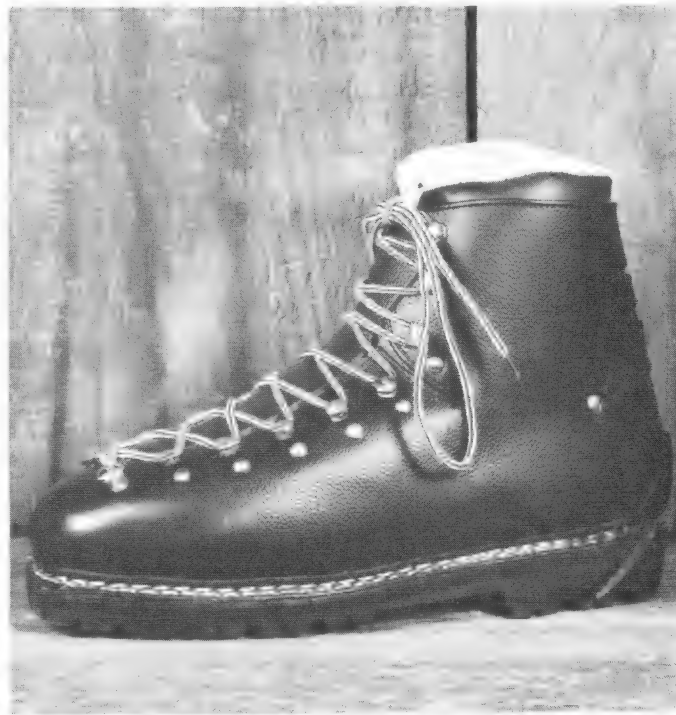

"RD" SUPER-GUIDE. By Galibier. A heavy-duty mountaineering boot with stiff sole. Tan rough-out uppers with "double-water-proof tanning." Used on many of the hardest climbs in the Alps and in North and South America. Upper is gusseted to keep out water and snow. Good for rock climbing. Lug welt soles. Sizes 6 to 13; medium width.

B403 ave. wt. 5½ lbs. \$78.00

HIVERNALE. By Galibier. A double boot with two sets of inner boots. The "arctic" inner is felt on the lower and leather on the upper exterior, fully lined with synthetic fur. The "alpine" inner has a black leather exterior and is lined with felt. Outer boot is smooth black leather with closely trimmed lug soles and is so lightweight that one can climb in it as well as in a single boot. Hinged heel. Lacing rings. For technical climbing in very cold weather. Sizes 5½ to 13; medium width.

B401 ave. wt. 6½ lbs. \$130.00

MINARET SKI MOUNTAINEERING. By Hochland. An imported combination boot that is supple and comfortable for touring yet readily serves for downhill skiing. Made of pebble-grained black leather with shallow-tread Vibram lug soles for ski-climbing. Inner speed-lacing. Hinged heel allows forward flexibility. For men and women. Sizes 6 to 14; widths: medium and wide.

B202 ave. wt. 5 lbs. \$40.00

"RR" YOSEMITE. By Galibier. Designed by Royal Robbins and manufactured by Galibier as a heavy-duty rockclimbing shoe. Not recommended for hiking. The Varappe has become the most popular and most versatile rockclimbing shoe in the United States. Rigid for edging and comfort in slings, yet sufficiently flexible to conform to sloping holds. Gripping device on lacing allows separate adjustment of lace tension for walking. Uppers are blue suede with a thickness of rubber over toe and heel counter; padded ankle; lug sole. Sizes 5 to 12; width medium.

B404 ave. wt. 3¼ lbs. \$45.00

COLIN FLETCHER

THE COMPLETE WALKER. The long-awaited straight-forward, practical handbook for the modern backpacker, beginning or experienced walker. Fletcher avoids the "old woodsman" approach which clutters most books on camping and back-packing technique. From his own experience—and avoiding generalities—he compares weights, quality and cost of boots, socks, packs, tents, tarps, accessories, food, etc., and gives advice ranging from the selection of gear to the best utilization of air drops. The most down-to-earth and up-to-date guide book for the serious walker yet published. Revised edition. . . . \$8.95

THE THOUSAND MILE SUMMER. The author's own story of his walk from the Mexican border to Oregon via California's backbone, across Death Valley and along the Sierra Nevada crest. . . . \$5.95

PLEASE READ BEFORE ORDERING!

HOW TO ORDER

1. FULL REMITTANCE must accompany order. Foreign orders payable in U.S. funds. Most out of stock items will be backordered and shipped on arrival unless cancellation is requested.
2. NO C.O.D. ORDERS. Because of the time and expense we do not accept C.O.D. orders.
3. MASTERCHARGE - BANKAMERICARD — Complete form on front of order. Do not send card

SHIPPING

1. Add up weight of merchandise. Refer to chart below to find appropriate zone. Use the "Shipping & Packing Chart" on the front to determine postage.
2. OVERSIZED PARCELS — Skis, some poles, some snowshoes, etc. will be shipped via alternate carrier. Postage Billed.
3. FOREIGN SHIPMENTS will be billed at International Parcel Post rates. Packframes exceed postal size limits, and must be shipped air freight. Please check with nearest airline for approximate cost.

4. To expedite delivery we will use United Parcel Service whenever convenient.

PRICES

PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE. Due to international fluctuation of U.S. currency, imported items are subject to frequent price changes. On minor increases, the merchandise will be shipped and you will be billed for the difference. Most of our customers prefer to receive their merchandise rather than wait to be notified of an increase. If a price change is unsatisfactory, please return the merchandise for a refund.

HOW TO RETURN MERCHANDISE

RETURN ITEMS within 30 days if not completely satisfied. Please enclose a letter explaining the problem and what changes you want made. Be sure to include your order number and the name of the person "Ordered By." For your protection please insure the parcel against loss. The Ski Hut sells only products of the finest workmanship. Your satisfaction is guaranteed.
